DOES WHAT IT SAYS ON THE TIN
Class 66
Capacity
Capacity
“That this house welcomes the publication of keeping the lights on and the traffic moving, a report highlighting the vital role rail freight plays in the economy”

Motion signed by 19 MP’s, September 2014
“We see rail freight as a national asset. A cleaner alternative to road and air freight. But this is not just an environmental case but a compelling economic case”

Stephen Hammond MP, 2013
“We want to encourage more freight onto rail. Again, that leads to discussions about how more capacity can be provided and whether that can be done without crowding out much-needed passenger services as well.”

Louise Ellman, Chair of Transport Select Committee
‘How the Rail Freight industry has responded to the needs of Britain’s logistics revolution’
Monday 15th June 2015
